 Filed: February 10, 2004
 Confirmation No.: 1049

AMENDMENTS TO THE CLAIMS

This listing of claims will replace all prior versions and listing of claims in the application.

Listing of Claims:

Claim 1 (Currently Amended) An anhydrous antiperspirant composition comprising

a) from 0.5 to 50% by weight of a particulate aluminium and/or aluminium/zirconium antiperspirant active;

b) from 30 to 95% by weight of a water-immiscible carrier fluid or mixture of fluids; and

c) from 0.1 to 40% by weight of a thickener, gellant or structurant for the carrier fluid;

in which the carrier fluid comprises an aryl substituted siloxane which satisfies the general formula 1

in which:

n represents an average number of from 0 to 2;

R¹ R² and R³, which may be the same as or different from each other, each represents R⁴ or a capping group R^C,

_____ wherein:

_____ R⁴ represents diphenylethyl, and

_____ R^C represents a residue of- ~~dimmer~~ dimer, benzyl

_____ alcohol or allyloxy —ethanol,

with the proviso that not more than 20% of the total occurrences of —R¹, R² and R³ are R^C, and R^A represents a methyl group;

Attorney Docket No.: J3711(C)
Serial No.: 10/775,510
Filed: February 10, 2004
Confirmation No.: 1049

and wherein at least 30% by weight of the carrier fluid or mixture of fluids is the aryl substituted siloxane, and wherein the anhydrous antiperspirant composition is in the form of a cream, soft solid or stick.

Claim 2 (Cancelled)

Claim 3 (Withdrawn) A composition according to claim 1 in which R^4 represent a mixture of diphenylethyl and the hydrogenated residue of α -methylstyrene dimer.

Claim 4 (Previously Presented) A composition according to claim 1 wherein R^C is the residue of α -methylstyrene dimer.

Claim 5 (Withdrawn) A composition according to claim 1 in which R^C represents a residue of benzyl alcohol or allyloxy ethanol.

Claim 6 (Previously Presented) A composition according to claim 1 at least 85% of the total occurrences of R^1 , R^2 , and R^3 are diphenylethyl.

Claim 7 (Previously Presented) A composition according to claim 1 in which n is from 0 to 1.5.

Claim 8 (Previously Presented) A composition according to claim 1 in which n is 0.

Claim 9 (Withdrawn) A composition according to claim 5 in which the proportion of diphenylethyl group is from 85 to 90%.

Claim 10 (Withdrawn) A composition according to claim 1 in which R^4 represents the residue of α -methylstyrene dimer.

Claim 11 (Withdrawn) A composition according to claim 10 in which n in the formula is 1 ± 0.2 .

Confirmation No.: 1049

Claim 12 (Currently Amended) A composition according to claim 1 in which at least 50% by weight of the carrier fluid or mixture of fluids is the aryl substituted siloxane ~~comprises at least 50% by weight of the carrier fluid or mixture of fluids.~~

Claim 13 (Currently Amended) A composition according to claim 12 in which ~~the aryl substituted carrier fluid comprises~~ from 60 to 90% by weight of the mixture of carrier fluids is the aryl substituted siloxane.

Claim 14 (Withdrawn) A composition according to claim 1 in which the mixture of carrier fluids comprises one or more water-immiscible fluids selected from volatile polycyclomethicone or linear polymethicone oils, non-volatile polymethicone oils, liquid branched aliphatic alcohol, liquid alkyl benzoate esters and liquid polyalkylene glycol ethers.

Claim 15 (Withdrawn) A composition according to claim 14 in which the carrier mixture comprises the aryl substituted siloxane fluid and the liquid branched aliphatic alcohol in a weight ratio of from 6:1 to 2:1.

Claim 16 (Previously Presented) A composition according to claim 1 in which the carrier fluid and suspended antiperspirant active have refractive index matching within 0.005 units.

Claim 17 (Withdrawn) A composition according to claim 1 in which the antiperspirant active is selected from aluminium chlorohydrate or activated aluminium chlorohydrate.

Claim 18 (Previously Presented) A composition according to claim 1 in which the antiperspirant active is selected from aluminium/zirconium chlorohydrate and complexes of aluminium/zirconium chlorohydrate with an amino acid.

Claim 19 (Original) A composition according to claim 18 in which the antiperspirant active is a complex of aluminium/zirconium chlorohydrate and glycine.

Confirmation No.: 1049

Claim 20 (Previously Presented) A composition according to claim 1 in which the carrier fluid is thickened or solidified with an effective amount of a structurant comprising a silicone-oil-soluble polymeric gellant or non-polymeric fibre-forming gellant.

Claim 21 (Withdrawn) A composition according to claim 20 in which the polymeric gellant comprises a polyalkylene, a polyalkylene/polyarylene block copolymer a polyamide or a polyamide/polysiloxane copolymer.

Claim 22 (Original) A composition according to claim 20 in which the non-polymeric fibre-forming gellant is selected from cellobiose esters, lanosterol, a combination of a sterol and a sterol ester, hydroxystearic acid, N-acyl amino acid amides and esters, diamido derivatives of cyclohexane, amido derivatives of aliphatic di or tri-carboxylic acids, and cyclic derivatives of aspartame.

Claim 23 (Previously Presented) A composition according to claim 1 in which the proportion of structurant is selected in the range of from 2 to 15% by weight.

Claim 24 (Currently Amended) A composition according to claim 1 in which the composition is in the form of a stick that has a hardness of greater than 0.5 at least 0.003-N/mm² by sphere indentation.
